PROFESSIONAL EXPERIENCE

Full Stack Web Developer Intern | *ZarvisGenix* | *May 2024 – August 2024*
- Full-Stack Development   Collaborated on building an e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), focusing on both frontend (React.js) and backend (Node.js, Express.js) development.
- Frontend UI Design   Developed responsive, user-friendly interfaces with React.js, including features like product listings, shopping cart, and user authentication.
- Backend Payment Integration   Created backend APIs for user data, product information, and order management, and integrated a secure payment gateway for seamless transactions.

Frontend Developer Intern | *EnropeSolutions* | *November 2024 – December-2024*
- Frontend Development   Building responsive interfaces with React.js and implementing features like navigation and authentication.
- Data Management   Utilizing Firebase Datastore for efficient data storage and retrieval.

PROJECTS

ShutterShare | *MERN Stack, Redux Toolkit, TailwindCSS, Cloudinary* | *GitHub — Live*
- Shutter Share, an innovative platform empowering photographers to upload, showcase, and monetize their high-quality photos, reaching a global audience.
- Developed a visually appealing and responsive photo-sharing platform using React.js, enabling photographers to promote, license, and sell their work with intuitive UI. Integrated Cloudinary for seamless image uploads and optimized performance.

LifeThreads | *MERN Stack,Redux Toolkit, TailwindCSS* | *GitHub —*
- LifeThreads, a social platform where users can share, organize, and view memories through threads of photos.
- Developed a responsive web application using React.js, enabling users to create, edit, and browse their memory threads with ease. Integrated Cloudinary for optimized media uploads and performance.

OpportuNest | *MERN Stack, Redux Toolkit,Cloudinary* | *GitHub — Live*
- Developed a job search platform connecting students and recruiters, allowing students to update profiles, upload resumes, and apply for job postings with a "save for later" option.
- Created an intuitive dashboard for recruiters to post job listings, manage applications, and make hiring decisions by accepting or rejecting candidates.
- Deployed on Render, utilizing Cloudinary for efficient resume management and ensuring a seamless user experience with responsive design.
